Summary

As an IT Engineer with over 10 years of experience, I have developed and automated internal processes using Microsoft Power Platform for 4 years. I have managed projects from inception to completion and built teams for various projects. Recently, I transitioned to full stack development, working as a software engineer for 6 months, with expertise in both front-end and back-end development using React. Known for my strong communication skills and teamwork, I am passionate about continuous growth and eager to contribute to meaningful projects.

Featured Projects

Most Parking for parking system (GrapeCity Mongolia LLC)

This project offers a flexible solution, gate stops and inspectors through automated operations. Our flexible payment system attracts investors to the parking business in Ulaanbaatar. I contributed to the Phase II update and billing system for most parking systems.

- Main registering operation for park and billing
- Bug and error fixes for full stack development

Freelancer platform (Intern of Pinecone Academy)

Our website is a freelancer platform that builds teams for diverse projects. We prioritize acquiring top talent to deliver high-quality results quickly and efficiently.

- Freelancer Profile section
- Leading the team for project
- Managing tasks to right people.

Education & Certifications
